

How To Brush

Brush in the morning and at night before going to bed.

Use a pea-sized amount of fluoride toothpaste on a soft toothbrush.

Brush teeth and along the gum using a gentle circular motion.
Start with the outside surfaces.

Repeat on the inside surfaces.

Use a light back and forth motion on the chewing surfaces.
Spit out toothpaste, but don't rinse with water.

Be sure to brush all surfaces: top and bottom, left and right, front and back.

Denture Care

Clean dentures in the morning and at night. Do this over a sink of water or towel to reduce the risk of breaking if dropped.

Use mild liquid soap on a soft toothbrush or denture brush.

Don't use toothpaste to clean dentures

Brush all surfaces of the denture well. Rinse with cold water.

Also clean the gums and tongue using a soft toothbrush in the morning and at night.

Take dentures out before you go to sleep at night. Keep cleaned dentures in a dry container overnight.

Have dentures checked regularly by an oral health professional to make sure they still fit and work well.
